‘Bringing Hybridizers and Growers Together’
Brugmansia Growers International

The International Cultivar Registration Authority for *Brugmansia* and *Datura*

In this issue:

Monika Gottschalk talks to BGI	3
New cultivar names	6
ICRA business	16

As the **ICRA** for *Brugmansia* and *Datura*, working with other enthusiasts' groups around the world, we maintain an exhaustive register of cultivar names and other details about each cultivar in searchable databases and image galleries, and we issue the BGI Herald which provides for the formal publication of new cultivar names and other matters concerning the correct naming of cultivars.

Monika Gottschalk, doyenne of *Brugmansia* breeding, talks with BGI's Dianne Wilson and Shaun Douglas.

BGI *Good morning Monika. Thank you for agreeing to have a chat with us. According to your website, the first *Brugmansia* you saw was in a magazine and it encouraged you to start growing them. Were you growing other plants at the time?*

Monika *Hallo Dianne and Shaun! Yes, I grew fuchsias, passifloras and other fruit-bearing plants at the time.*

BGI *What was the first *Brugmansia* that you purchased or was given to you?*

Monika *My very first was a white-flowering *Brugmansia suaveolens*.*

BGI *Do you remember your first attempt at hybridizing and which cultivars you used?*

Monika *My first attempt to hybridise was in 1985, with two pink *Brugmansia suaveolens*.*

BGI *Were they successful?*

Monika *The result of it was very disappointing: none of the seedlings were a improvement of their parents. I almost gave up!*

BGI *Who was your biggest influence in hybridizing at the time?*

Monika *It was a elderly garden master who encouraged me to continue with it. Newly introduced but harder-to-grow species like various *Brugmansia aurea*, and hybrids like 'Ocre' became available in special nurseries, and I found other *Brugmansia* enthusiasts like Gottfried Koitzsch and later Emma Neu. Then in 1991 I met Herta Blin, who was a great influence.*

BGI *You have had over 200 cultivars registered. In your opinion what has been your most successful cross?*

Monika *I consider several crosses as very successful. My first very good cross was 'Charleston' × 'Luminosa'. It has produced 'Bolero' and 'Fandango'. Especially 'Bolero' has become one of my best mother*

plants. 'Rothkirch' x 'Balao' has produced several good F1 hybrids like 'De Moi ut Ostfreesland'. The same goes for the cross 'Ecuador Pink' x 'Rothkirch' with their F1 hybrids such as 'Rubirosa', 'Rose Beauty' and more.

BGI *Do you grow out every seed from a pod?*

Monika *I grow out all seeds. It is the only way to find out about the inheritance of both parents.*

Brugmansia 'De Moi ut Ostfreesland' — photo M. Gottschalk.

BGI *What's the largest number of seedlings you have grown out in a year?*

Monika *In good times, I grew out up to 400 seedlings within one year.*

BGI *In some of your latest registrations you have used the pink single Candida, 'De Moi ut Ostfreesland', a 'Rothkirch' × 'Balao' cross. Do you have any seedlings from 'De Moi ut Ostfreesland' coming along now?*

Monika The cross with 'Bolero' and the relatively new pink *Brugmansia versicolor* 'Katharina Theby' had priority for me last year. The latter was grown here out of seeds and is therefore better adapted to the cool and rough Vogelsberg mountain climate than *B. versicolor* that originated from their natural habitat, but new crosses with 'De Moi ut Ostfreesland' are already planned. I do have seedlings of 'De Moi ut Ostfreesland', the pod parent is 'Fandango'! The latter had produced some good offspring with 'Rubirosa' as pollen parent but I consider 'De Moi ut Ostfreesland' to be a better parent because it has no genes of 'Ecuador Pink'.

BGI *Have you grown a cultivar that you consider to be perfect?*

Monika If I must be honest, then I have to answer with 'No'!

BGI *Is there a cultivar, raised by someone other than yourself, that you particularly admire?*

Monika It is 'Charleston' bred by Herta Blin. It is a very fine hybrid and was and still is my basis for *Brugmansia* breeding. In the beginning it was said that 'Charleston' was difficult to propagate, but it is not if you choose the right time for propagating — from late spring until September. It is true that it grows very slowly and takes two seasons to become a large plant, but 'Charleston' grows and flowers very well at my place and each year I propagate several cuttings of it.

BGI *What do you look for when you are deciding which cultivars will produce the type of flower that you are aiming for?*

Monika First priority for me is the parentage, the pedigree of each hybrid I plan to breed with. From the beginning of my hybridizing I have made notes of all the seedlings out of all my crosses, of the quality and the characteristics inherited. If one of the chosen parents is too much influenced, for example, by *B. suaveolens*, and I do not want too much influence of that species, I will search for a good parent without it. I neglect those I know to be weak in inheritance. To do that you have to know about the strength and weaknesses of each species. I have used

only very few no name hybrids for hybridizing unless I believe it will add a certain trait to my breeding stock.

Brugmansia 'Charleston' — photo M. Gottschalk.

BGI Which three cultivars would you choose if you wanted to start hybridizing brugmansias for the first time?

Monika I would again start with 'Charleston' — my absolute favourite; 'Bolero' would be the second and 'De Moi ut Ostfreesland' my third choice.

BGI Who in your opinion is a promising new hybridizer and the one to watch for interesting cultivars in the future?

Monika That question is not easy for me to answer. At the moment it appears to me that quantity goes over quality. I try to encourage newbies to make a critical reflection on their seedlings or hybrids and compare them with already available similar-looking hybrids, and

years of active hybridizing, I have raised thousands of seedlings but not many I found to be worthy to be named. Hybridizing means also a steady improvement for me.

BGI Have you always been in your present nursery and when did you begin to design your famous allée?

Monika We moved in 1993 to our present home with a large garden and much room for experimental breeding and growing *Brugmansia*. Because I have always favoured the tree form, the first *Brugmansia* tree I have raised was in 1986 out of cutting from a unnamed hybrid of Gottfried Koitzsch. It was a beautiful cream-coloured Candida-type. The next tree was 'Charles Grimaldi'. I loved it!

BGI One of the trees in the allée is about 20 yrs old, according to Huanduj, a very beautiful 'Mobisu'. Do you use the same cultivars or do you introduce newer ones from time to time?

Monika I am always trying to improve my own hybrids and for that reason, older ones are and will be replaced with newer better hybrids.

BGI For the benefit of our members who may travel to Germany, is your garden open to the public or by appointment only?

Monika My garden is in the summertime always open for visitors but by appointment only. Health problems of my husband is the reason for it.

BGI Do you travel to visit other brugmansias growers in Europe and elsewhere?

Monika I used to travel, but not any longer. But good friends still come to visit me for never-ending talks about *Brugmansia*.

BGI The book that you wrote with Alistair Hay and Adolfo Holguín — Huanduj — which is now considered the *Brugmansia* bible...

Monika Thank you, but I added only a small part to it! [*Far too modest!* ed.]

BGI Whose idea was it initially and did it take much persuading to bring the other two to undertake such a mammoth task?

Monika If I remember correctly it was Alistair, who initiated the idea, and I thought it would be a wonderful idea to introduce our beautiful brugmansias all over the world.

Brugmansia 'Bolero' — photo M. Gottschalk.

be willing to dispose of them if the quality is lacking. That is what I do. During almost 30

BGI *You have achieved so much, more than 200 registered Brugmansia cultivars, Huanduj and your earlier books, the allée, your beautiful garden with all of the other plants that you obviously love and are very successful in growing. Have you realized all that you wished to do in the field of brugmansias?*

Monika I probably have not realized all of it. There is still much to do.

BGI *Is there still something that you will be aiming for?*

Monika I dream of a robust heavy-flowering beautiful yellow or golden yellow double with pendent large Candida-type flowers with long tips. That will be my goal. My dream of the perfect *Brugmansia* will probably never come true because it is almost impossible to achieve. For that reason, I would already be satisfied if I

would get pest-resistant cultivars that are robust and well-flowering with long-lasting flowers. Quality true yellow or golden yellow doubles are not easy to breed. I have only two that I am satisfied with, 'Goldika' and 'Vulkangold'. They are robust and grow very well. They have medium to large, long lasting flowers. One of them flowers in large flushes and pests are rather rare to find on both of them. They are a start to hybridize with but both are not the 'non plus ultra' (the best they could be).

BGI *Thank you very much, Monika, for taking the time to chat to BGI and giving our members an idea of what it takes to be a successful Brugmansia hybridizer.*

Monika It is a pleasure!

New cultivar names sent in to BGI for establishment

***Brugmansia* 'Aphrodite'**

Pod Parent: *Brugmansia* 'Jericho'

Pollen Parent: *Brugmansia* 'Eva'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: orange

Flower Position: pendent

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: orange and white on the middle of the skirt

***Brugmansia* 'Appalachian Melody'**

Pod Parent: *Brugmansia* 'Tootsie'

Pollen Parent: *Brugmansia* 'Shooting Star'

Hybridizer: Brenda Delph/Seed Sprout Nursery

Seedling Parent: Brenda Bautista

Flower Form: single

Flower Color: yellow to orange

Flower Position: upright

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: flower upright to horizontal, petite, sweet fragrance; compact slow-growing plant; leaves dark green, ovate and crinkled; roots slowly; cultivated since 2007.

***Brugmansia* 'Bella di Pesco'**

Pod Parent: *Brugmansia* 'New Orleans Lady'

Pollen Parent: *Brugmansia* 'Swart Garten'

Hybridizer: Green Chapel Farms

Seedling Parent: Joan Olsen Davis

Flower Form: double or more

Flower Color: apricot/melon/peach

Flower Position: nodding

Flower Shape: trumpet

Species/Breeding History Set: Cubensis

Comments: warm peach color establishes early; flowers last 5 or more days; extremely mite resistant. See also Herald 10 (2) 2014.

***Brugmansia* 'Betelgeuse'**

Pod Parent: *Brugmansia* 'Archangel'

Pollen Parent: *Brugmansia* 'Golden Lady'

Hybridizer: Alice Harris

Seedling Parent: Alice Harris (USA)

Flower Form: single

Flower Color: yellow

Flower Position: horizontal

Flower Shape: trumpet

Foliage: dark, variegated paler green, rippled

Species/Breeding History Set: Cubensis

Comment: large horizontal blooms finish darker at edges.

***Brugmansia* 'Bitaco Lila'**

Pod Parent: *B. arborea* X *B. 'Signal'*

Pollen Parent: *Brugmansia* 'Vanishing Pink'

Hybridizer: Alistair Hay

Seedling Parent: José Quintana (Colombia)

Flower Form: single

Flower Color: lilac, slight coppery overtone

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Rubella

Comments: scented, virus-tolerant, free-flowering.

***Brugmansia* 'Crème Brûlée'**

Pod Parent: *Brugmansia* 'Zumba'

Pollen Parent: *Brugmansia* 'Eva'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: orange

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: well-formed double orange flowers.

***Brugmansia* 'DS Andalouse'**

Pod Parent: *Brugmansia* 'Jericho'

Pollen Parent: *Brugmansia* 'Eva'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: orange

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: strong orange double to triple flowers.

Brugmansia 'Eva'

Pod Parent: *Brugmansia* 'Revorange'

Pollen Parent: *B.* 'Angels Exotic'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: pink

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: large strong flowers with conspicuous petal tips.

Brugmansia 'Fiesta'

Pod Parent: *B.* 'Ruffles & Flourishes'

Pollen Parent: *Brugmansia* 'Bergkönigin'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Dianne Wilson (Australia)

Flower Form: double or more

Flower Color: splashed yellow, then pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: leaves rounded, dark green.

Species/Breeding History Set: Cubensis

Comments: sweet perfume; heavy flushes; easy to propagate; pest-resistant.

Brugmansia 'Granny's Attic'

Hybridizer: unknown

Seedling Parent: Jeff Oberhaus (USA)

Flower Form: single

Flower Color: cream

Flower Position: nodding

Flower Shape: trumpet

Foliage: large, rather narrow, rugose, serrated.

Species/Breeding History Set: aur+

Comments: *B. aurea* attributes; good mite resistance; slightly orange along edges at times; fragrance with hint of mothball.

Brugmansia 'Great Expectations'

Pod Parent: *Brugmansia* 'Angels Exotic'

Pollen Parent: *B.* 'Theas Liebling'

Hybridizer: Green Chapel Farms

Seedling Parent: Joan Olsen Davis (USA)

Flower Form: double or more

Flower Color: pink

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: corollas heavily frilled, with curling tendrils. See also Herald 10 (1) 2014.

Brugmansia 'La Bamba'

Pod Parent: *Brugmansia* 'Rothkirch'

Pollen Parent: unknown

Hybridizer: Alice Harris

Seedling Parent: Alice Harris (USA)

Flower Form: single

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: aur+

Comment: Many qualities of 'Rothkirch'; handles cold and heat well; excellent fragrance.

Brugmansia 'Mamasita'

Pod Parent: *Brugmansia* 'Chablis'

Pollen Parent: *Brugmansia* 'Birgit'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Elizabeth Fichtl (USA)

Flower Form: double or more

Flower Color: orange

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: robust flower - 16" length.

Brugmansia* 'Miss Rhianna'*Pod Parent:** *Brugmansia* 'Rosalie'**Pollen Parent:** *B.* 'Dark Rosetta' X
'Apricotqueen'**Hybridizer:** Paul Phillips**Seedling Parent:** Paul Phillips (USA)**Flower Form:** double to quadruple**Flower Color:** pink**Flower Position:** pendant**Flower Shape:** funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comments:** almost always blooming; holds well
in heat; beautiful form.***Brugmansia* 'Mitzy's Kiss'****Pod Parent:** *Brugmansia* 'Chablis'**Pollen Parent:** *Brugmansia* 'Birgit'**Hybridizer:** Elizabeth Fichtl**Seedling Parent:** Elizabeth Fichtl (USA)**Flower Form:** double or more**Flower Color:** pink**Flower Position:** pendant**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comments:** chubby, short stature flower on a
short stature tree; very long petal tips.***Brugmansia* 'Ninotchka'****Pod Parent:** *Brugmansia* 'Moulin Rouge'**Pollen Parent:** *Brugmansia* 'Rubirosa'**Hybridizer:** Elizabeth Fichtl**Seedling Parent:** Elizabeth Fichtl (USA)**Flower Form:** double or more**Flower Color:** pink**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** lovely form and color.

***Brugmansia* 'North Star'**

Pod Parent: *Brugmansia* 'Archangel'
Pollen Parent: *Brugmansia* 'Rothkirch'
Hybridizer: Alice Harris
Seedling Parent: Alice Harris (USA)
Flower Form: single
Flower Color: white/cream
Flower Position: horizontal
Flower Shape: trumpet
Foliage: solid
Species/Breeding History Set: Cubensis?
Comments: horizontal, thick-textured flowers; rich green foliage.

***Brugmansia* 'Perroquet'**

Pod Parent: *Brugmansia* 'Jericho'
Pollen Parent: *Brugmansia* 'Eva'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: double or more
Flower Color: orange
Flower Position: nodding
Flower Shape: trumpet
Foliage: solid
Species/Breeding History Set: Cubensis
Comment: Inner corolla deeply dissected.

***Brugmansia* 'Petit Bijou'**

Pod Parent: *B.* 'Angels Goldface'
Pollen Parent: *Brugmansia* 'Triplette'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: double or more
Flower Color: yellow/orange
Flower Position: nodding
Flower Shape: trumpet
Foliage: solid
Species/Breeding History Set: Cubensis
Comments: neat waxy flowers, with the inner corolla more or less orange.

***Brugmansia* 'Rouge de Didier'**

Pod Parent: *Brugmansia* 'DS Mandarine'
Pollen Parent: *Brugmansia* 'Mr Loulou'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: single
Flower Color: deep reddish pink
Flower Position: nodding
Flower Shape: funnel
Foliage: solid
Species/Breeding History Set: Cubensis
Noteworthy Characteristics: deep rich colour.

***Brugmansia* 'Seastar'**

Pod Parent: *Brugmansia* 'Tijericho'
Pollen Parent: *Brugmansia* 'Cruzito'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: single
Flower Color: pink
Flower Position: nodding
Flower Shape: funnel
Foliage: solid
Species/Breeding History Set: Cubensis
Comment: corollas deeply dissected.

***Brugmansia* 'Snowstar'**

Pod Parent: *Brugmansia* 'Tijericho'
Pollen Parent: *Brugmansia* 'Cruzito'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: single
Flower Color: white/Cream
Flower Position: nodding
Flower Shape: funnel
Foliage: solid
Species/Breeding History Set: Cubensis
Comment: corollas deeply dissected

***Brugmansia* 'Temple Bell'**

Pod Parent: *Brugmansia* 'Super Spot'

Pollen Parent: *Brugmansia* 'Mustafa'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Elizabeth Fichtl (USA)

Flower Form: double or more

Flower Color: very dark pink/red

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: large, heavy, thick-walled flower; seasonal from medium to very dark pink-red.

***Brugmansia* 'Terracotta Angel'**

Pod Parent: *Brugmansia* 'Vixen'

Pollen Parent: *Brugmansia* 'Rosabelle'

Hybridizer: Dawna Bernier

Seedling Parent: Dianne Wilson (Australia)

Flower Form: single

Flower Color: apricot

Flower Position: nodding

Flower Shape: intermediate trumpet/funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: small, slow growing; flowers lemon changing to terracotta, often 6-pointed; recurve to a star shape; no problems with mites/virus.

***Brugmansia* 'Umbacher Sonnenuntergang'**

Pod Parent: *Brugmansia* 'Apricot' [HHG]

Pollen Parent: unknown

Hybridizer: Horst Laubert

Seedling Parent: Horst Laubert (Germany)

Flower Form: single

Flower Color: salmon pink

Flower Position: nodding

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: ins +?

Comment: salmon funnel-shaped flowers.

***Brugmansia* 'Vanilla Split'**

Pod Parent: *Brugmansia* 'Angels Swingtime'
Pollen Parent: *Brugmansia* 'Angels Sunbeam'
Hybridizer: Eddie Stiltner
Seedling Parent: Dianne Wilson (Australia)
Flower Form: double or more
Flower Color: cream
Flower Position: pendant
Flower Shape: trumpet
Foliage: solid
Species/Breeding History Set: Cubensis
Comments: inner corolla dissected; slow grower; foliage mid-green; cuttings take easily; readily sets seed.

***Brugmansia* 'Yellow Miko'**

Pod Parent: *Brugmansia aurea* (yellow)
Pollen Parent: *Brugmansia* 'Sacred Sunset'
Hybridizer: Jeff Horder
Seedling Parent: Jeff Horder (Australia)
Flower Form: single
Flower Color: yellow
Flower Position: nodding
Flower Shape: intermediate trumpet/funnel
Foliage: solid
Species/Breeding History Set: Suarea?
Comments: firm textured flower; fragrance tropical, light note.

***Brugmansia* 'Zumba'**

Pod Parent: *Brugmansia* 'Tijericho'
Pollen Parent: *B.* 'Rouge de Didier'
Hybridizer: Didier Sevestre
Seedling Parent: Didier Sevestre (France)
Flower Form: single
Flower Color: strong reddish pink
Flower Position: nodding
Flower Shape: funnel
Foliage: solid
Species/Breeding History Set: Cubensis
Comment: flowers of very strong red-pink.

ICRA BUSINESS

A number of new *Brugmansia* cultivar names have been placed in the public domain on-line or in electronic publications which do not meet the conditions of publication set out in the 2009 ICNCP — specifically that they should appear in dated hard copy (Art. 25.1). Such names are open to establishment for other cultivars, and their cultivars are open to having other names established for them. Therefore, in the interests of nomenclatural stability, we establish them here. If it transpires that any of these have in fact already been established, then those names of course date from the earlier publication. It is to be understood that the epithets listed here are preceded by the name of the denomination class, *Brugmansia*.

Epithet	Flower Colour	Petal Tips	Flower Form	Pod Parent	Pollen Parent	BHS	Hybridizer or Discoverer	Seedling Parent	Origin	Year
'Alexanderhauser Sonnenaufgang'	cream/yellow	medium	double			Cubensis?	Gisela Kühn	Horst Laubert (Germany)	Germany	2013
'Anitas Pretty Pink'	pink	medium	single	Pink Favorite	Kim	Suavins-aurea	Anita Schaumann		Germany	ca. 1998
'Autumn's Glow'	gold	medium	single			sua +?	George Hilder		USA	2013?
