‘Bringing Hybridizers and Growers Together’

Brugmansia Growers International

The International Cultivar Registration Authority for *Brugmansia* and *Datura*

In this issue:

Alice Harris' <i>Brugmansia</i> Journey	3
New cultivar names	5
ICRA business	20

As the **ICRA** for *Brugmansia* and *Datura*, working with other enthusiasts' groups around the world, we maintain an exhaustive register of cultivar names and other details about each cultivar in searchable databases and image galleries, and we issue the BGI Herald which provides for the formal publication of new cultivar names and other matters concerning the correct naming of cultivars.

Alice Harris' *Brugmansia* Journey

I have been growing plants for almost all of my life. My family over the generations have always farmed or grown gardens. My parents grew beautiful roses, many flowers, and a large vegetable garden which supplied much of our food. My mother, who had lupus and was sensitive to sunlight, grew African violets and house plants on her windowsills, and container gardens of all sorts on her porches.

I remember helping her start seeds and working in the gardens from very young. As children, we were given our own garden spaces and taught to grow plants from seed. It's amazing what a child can learn just by being with and helping her parents and grandparents. Before even into my teens I knew much about growing roses and other plants, and more about gardening than most adults.

Brugmansia 'Miss September' — photo Edna Murphree

Prior to *Brugmansia*, I experimented with different plants: *Abutilon*, *Canna*, *Buddleja*, *Pelargonium*, herbs, and others. The first time

that I saw a brugmansia was in a black and white drawing in an old seed catalogue. I knew I would like to grow them and searched locally, but no brugmansias were to be had in my part of the world. In fact, no one had even heard of them.

Datura and *Brugmansia* were lumped together in those days, and I finally found a large flowering *D. inoxia*: I spotted one blooming in a yard and the owner was kind enough to share.

When the new Flower & Herb Exchange (part of Seed Savers) was formed, I joined and saw another member offering *Brugmansia* cuttings in California, 'Charles Grimaldi', 'Insignis Pink', and a double white, the first time that I had found any actual brugmansias to acquire.

A few years later and on the internet, I joined the newly formed GardenWeb when it was just a handful of members. My first trade there, also from California, sent cuttings from his white *B. suaveolens*, and my second, in Texas, sent cuttings from her 'Species' double white and "Equadore" (probably 'Ecuador Pink').

It was fall in those areas and already cold in mine, but somehow the cuttings survived their chilly travels in the mail. I placed them in vermiculite on the window sill of a large bay window (best light) in an unheated room that we were just adding — not the best of conditions. By spring they rooted and I finally had several varieties of growing brugmansias, and I was thrilled.

I saw my first fully grown *Brugmansia* in bloom that fall, in the private greenhouse of a local grower. It was an 'Insignis Pink' that the owner had brought from California.

Eldest daughter Holly was attending Penn State majoring in horticultural genetics, so she and I decided to try our hands at hybridizing

Brugmansia 'Rothkirch' — photo Alice Harris

Brugmansia with what we had at hand. Our first hybrid to keep was 'Cher Chez la Femme'.

It seems naive to me now, but I knew nothing about registering hybrids. Someone told me about the *Brugmansia* groups, so I joined and registered most of our then new hybrids in 2004. It was good to learn more about growing, meeting others who enjoyed brugmansias, and to exchange cultivars.

After a year of waiting, my order with Native Habitat Ethnobotanicals arrived with a blooming 'Rothkirch'. A new *Brugmansia* friend, Gloria Lessner, sent 'Golden Lady'. As each came to bloom, I started crossing them with whatever looked as though they could achieve a good outcome. Looking back, at that point I had the basics then, even without adding more varieties, to create many of the lovely hybrids possible today.

We are ever at the mercy of changing weather. In my part of the world it can go over 100°F in

summer (under glass much hotter) and well below 0°F in winter. We can have strong sun in cloudless skies for weeks, bad storms, lightning, hurricanes, tornadoes, heavy rain and hail, snow, sleet, ice, high winds, and blizzards.

Our elevation at over 1250' on an ascending ridge to the Alleghenies does not help either. Greenhouses can fry in high heat or not be able to sustain heat when temperatures are frigid. Panes have blown out in storms and broken in hail, and greenhouses have nearly blow down. Also due to climate, our plants are not ready to go out until April/May, which puts us at a disadvantage to warmer climate growers. Most of our plants somehow survive to do very well in spite of harsher conditions. Each spring, I am always glad when winter is gone and hopeful that the summer to follow will be one for good growing.

I am always sad for what might have been, but also grateful for all the good crosses that have made it to be shared all over the world. The "Miss" collection started when we named them for our children's birth months. They were so popular, we ended up naming one for each

month of the year so that everyone could have a birthday *Brugmansia*.

Out of necessity in the face of a rampant virus affecting cannas, I slowed on hybridizing brugmansias for a few years to devote time to better understand canna disease, to search for still non-diseased varieties, and to hybridize an entire new canna collection. No small feat!

We are blessed that our soil is rich, our water supply good, and that we are isolated from other growers, which helps a lot to grow and maintain a clean crop. We still constantly monitor both the cannas and brugs for disease. Having lived through that once, I would never want to be there again.

Most of our European brugmansias were imported from Monika Gottschalk and quarantined in Florida before propagating. It was a lot of fun to acquire and grow so many new varieties and to be able to use them in hybridizing. We are fortunate that some of the more rare brugmansias still grow here — ‘Rothkirch’, ‘Charleston’, ‘Tutu’, ‘Species’, ‘Ecuador Pink’, ‘Ocre 2000’ (“Ocre Neu”), ‘Butterfly’, to name a few. Of the hundreds of varieties we now grow, the simplistic beauty of ‘Rothkirch’ is ever my top favorite.

I never dreamed that my little handful of *Brugmansia* cuttings would be the beginnings of a passion that would lead to growing hundreds of varieties in the years to follow. But although there have been many, I still never tire of growing a beautiful new one, the excitement and the marvel of watching it grow to bloom and possibly to add to my hybridizing program.

In later years, I have come to hybridize less, but concentrate on excellence in what we grow. With so many seed growers these days, hybrids are looking too much alike and becoming more difficult to differentiate. But there are still avenues to pursue. I especially like working with the Aurea type brugmansias.

The most rewarding aspect to me in growing is the beauty and positivity flowers bring to enrich lives and make people happy. As brugmansias have brought so much joy to my life, it is good to be able to share with others, especially those in which I have had a hand. I have never seen a blooming *Brugmansia* make someone unhappy, and I have been both honoured and pleased to be part of this brugmansia journey.

Alice Harris

New cultivar names sent in to BGI for establishment

***Brugmansia* 'Amasanga'**

Pod Parent: *Brugmansia insignis* (pink)

Pollen Parent: *Brugmansia insignis* (pink)

Hybridizer: Alistair Hay (Colombia)

Seedling Parent: Alistair Hay (Australia)

Flower Form: single

Flower Color: white/cream

Flower Position: nodding

Flower Shape: funnel

Foliage: Solid

Species/Breeding History Set: Insignis

Comments: very dark green narrow leaves.

Brugmansia 'Artus'

Pod Parent: *Brugmansia 'Cordata Red'*

Pollen Parent: *Brugmansia 'Purple Princess'*

Hybridizer: Bernhard Saathoff

Seedling Parent: Bernhard Saathoff (Germany)

Flower Form: single

Flower Color: very dark pink/red/burgundy

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Arbovulsa

Comment: vigorous grower, floriferous, virus-tolerant; seldom without a blossom; colour from 75 to 81 on BGI colour chart, depending on temp.

Brugmansia 'Aslan'

Pod Parent: *Brugmansia 'Wildfire'*

Pollen Parent: *Brugmansia 'Mystic Fire'*

Hybridizer: Bernhard Saathoff

Seedling Parent: Bernhard Saathoff (Germany)

Flower Form: single

Flower Color: lilac/purple

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Arbovulsa

Comments: foliage like 'Wildfire'; outstanding colour, in a range from 92-96 on BGI colour chart, pattern in blossom stable.

Brugmansia 'Atout Coeur'

Pod Parent: *Brugmansia 'Zumba'*

Pollen Parent: *Brugmansia 'Eva'*

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: pink nodding double flowers.

Brugmansia 'Aube Sanguine'**Pod Parent:** *Brugmansia* 'Triplette'**Pollen Parent:** *Brugmansia* 'DS Mandarin'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** single**Flower Color:** orange**Flower Position:** nodding**Flower Shape:** intermediate trumpet funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** very intense red/orange corollas.***Brugmansia 'Candyfloss'*****Pod Parent:** *Brugmansia* 'Tutti Frutti'**Pollen Parent:** *Brugmansia* 'Margaret'**Hybridizer:** Gill Peters**Seedling Parent:** Gill Peters (UK)**Flower Form:** single**Flower Color:** pink**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comments:** long-lasting blooms in heavy flushes; opens white and matures to a baby pink; strong baby powder scent with citrus undertones; high pest resistance.***Brugmansia 'Chabalou'*****Pod Parent:** *Brugmansia* 'Rosa Parks'**Pollen Parent:** not recorded**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** single**Flower Color:** orange**Flower Position:** nodding**Flower Shape:** funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** orange suaveolens-like flowers.

***Brugmansia* 'Cruzito'**

Pod Parent: *Brugmansia* 'Big Cruzy'

Pollen Parent: *Brugmansia* 'Froufrou'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: very dark pink/red/burgundy

Flower Position: nodding

Flower Shape: intermediate trumpet funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: very deep pink ruffled double flowers with short petal tips.

***Brugmansia* 'Danny Boy'**

Pod Parent: *Brugmansia* 'El Dorado'

Pollen Parent: *Brugmansia* 'Butterfly'

Hybridizer: Dan Carter

Seedling Parent: Dianne Wilson (Australia)

Flower Form: single

Flower Color: yellow

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Noteworthy Characteristics: strong, tall, fast grower; good flushes of waxy blooms, heavily scented; aurea-like perfume with hints of marzipan.

***Brugmansia* 'Delicatesse'**

Pod Parent: *Brugmansia* 'Froufrou'

Pollen Parent: *Brugmansia* 'Eva'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: distinctive double pink and green flowers.

Brugmansia* 'DS Elegance'*Pod Parent:** *Brugmansia* 'Kir'**Pollen Parent:** *Brugmansia* 'Super Pink'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** single**Flower Color:** pink**Flower Position:** pendant**Flower Shape:** trumpet**Foliage:** Solid**Species/Breeding History Set:** Cubensis**Comment:** almost pendent strong pink flowers in profusion.***Brugmansia* 'DS Flamme'****Pod Parent:** *Brugmansia* 'Zumba'**Pollen Parent:** *Brugmansia* 'Eva'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** single**Flower Color:** pink**Flower Position:** pendant**Flower Shape:** trumpet**Foliage:** solid**ISpecies/Breeding History Set:** Cubensis**Comment:** flowers bicolored - pink stripes on pale orange skirt.***Brugmansia* 'DS Mambo'****Pod Parent:** *Brugmansia* 'Jericho'**Pollen Parent:** *Brugmansia* 'Eva'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** single**Flower Color:** yellow**Flower Position:** pendant**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** flower with undulate edges.

***Brugmansia* 'DS Mandarin'**

Pod Parent: *Brugmansia* 'Tip Top'

Pollen Parent: *Brugmansia* 'Pêche Melba'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: orange

Flower Position: nodding

Flower Shape: intermediate trumpet funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: intense orange flowers.

***Brugmansia* 'DS Sublime'**

Pod Parent: *Brugmansia* 'Jericho'

Pollen Parent: *Brugmansia* 'Eva'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: orange

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: Double flowers of a clear orange.

***Brugmansia* 'Fatso Two'**

Pod Parent: *Brugmansia* 'Jacayna'

Pollen Parent: *Brugmansia* 'Lizzy'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Brent Fellmy (USA)

Flower Form: double or more

Flower Color: white/cream

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: tall grower with saw-tooth leaves; consistent bloomer; very strong lemon scent.

Brugmansia 'Fond de Teint'**Pod Parent:** *Brugmansia* 'Angels Swingtime'**Pollen Parent:** *Brugmansia* 'Laïka'**Hybridizer:** Serge Born**Seedling Parent:** Serge Born (France)**Flower Form:** single**Flower Color:** apricot/melon/peach**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** medium sized; very floriferous; very soft color.***Brugmansia 'Froufrou'*****Pod Parent:** *Brugmansia* 'Angy'**Pollen Parent:** *B.* 'Mon Amour de Mareuil'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** double or more**Flower Color:** very dark pink/red**Flower Position:** nodding**Flower Shape:** intermediate trumpet funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** Deep reddish pink double flowers; very short petal tips.***Brugmansia 'Hinton Ampner'*****Pod Parent:** *B.* ('Mobisu' x 'Roter Vulkan') x Zuñac #4**Pollen Parent:** *B.* 'Inca Queen' x *B. vulcanicola***Hybridizer:** Mike Pettit**Seedling Parent:** Mike Pettit (UK)**Flower Form:** single**Flower Color:** bright red and golden yellow**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Arbovulsa**Comment:** heat- and virus-tolerant.

***Brugmansia* 'Ice Cream'**

Pod Parent: *Brugmansia* 'Angels Goldface'

Pollen Parent: *Brugmansia* 'Triplette'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: white/cream

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: a cream "stuffed" double with short petal tips.

***Brugmansia* 'Jazzy Lady'**

Pod Parent: *B.* 'New Orleans Lady'

Pollen Parent: *Brugmansia* 'Margaret'

Hybridizer: Gill Peters

Seedling Parent : Gill Peters (UK)

Flower Form: double or more

Flower Color: cream and peach

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Noteworthy Characteristics: petite bloom starts as white tinged with pink and matures to cream with deep peach inner corolla; long petal tips with no recurve; very strong baby powder fragrance; high pest resistance.

***Brugmansia* 'Jericho'**

Pod Parent: *Brugmansia* 'CGPF' (sic)

Pollen Parent: *Brugmansia* 'Goldtraum 2'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: orange

Flower Position: nodding

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Noteworthy Characteristics: Bright orange funnel-shaped flowers.

Brugmansia 'Kjuangold'**Pod Parent:** *Brugmansia* 'Bernstein'**Pollen Parent:** *Brugmansia* 'Herbstzauber'**Hybridizer:** Fred Sommer**Seedling Parent:** Brent Fellmy (USA)**Flower Form:** double or more**Flower Color:** gold**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** tall grower with sawtooth leaves; consistent bloomer; very fragrant.***Brugmansia 'Laetitia'*****Pod Parent:** *B.* 'Langenbuscher Garten'**Pollen Parent:** *B.* 'Angels Swingtime'**Hybridizer:** Serge Born**Seedling Parent:** Serge Born (France)**Flower Form:** double or more**Flower Color:** white/cream**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** dense flushes on strong branches; flowers with yellow reflections; leaves elongate, serrated.***Brugmansia 'Louka'*****Pod Parent:** *Brugmansia* 'Angels Goldface'**Pollen Parent:** *Brugmansia* 'Triplette'**Hybridizer:** Didier Sevestre**Seedling Parent:** Didier Sevestre (France)**Flower Form:** double or more**Flower Color:** yellow**Flower Position:** pendant**Flower Shape:** intermediate trumpet/funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** pendent flowers with short petal tips.

***Brugmansia* 'Malala'**

Pod Parent: *Brugmansia* 'Coeur Blanc'

Pollen Parent: *Brugmansia* 'Belle Amour'

Hybridizer: Alice Harris

Seedling Parent: Brent Fellmy (USA)

Flower Form: double or more

Flower Color: white/cream

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: medium tall plant with sawtoothed leaves; fast grower; excellent bloomer; light scent.

***Brugmansia* 'Marque Flame'**

Pod Parent: *Brugmansia* 'Bernstein'

Pollen Parent: *Brugmansia* 'Herbstzauber'

Hybridizer: Fred Sommer

Seedling Parent: Brent Fellmy (USA)

Flower Form: single

Flower Color: gold

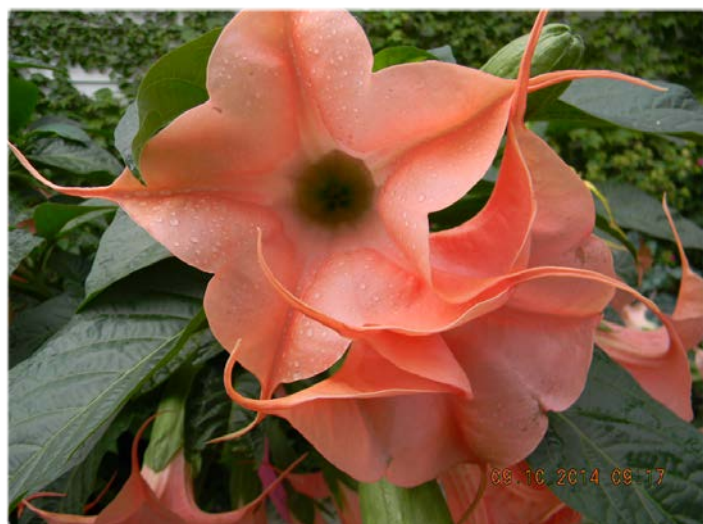

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: tall grower with sawtooth leaves; easy to propagate; no problems with insects; heavy bloomer; strong scent.

***Brugmansia* 'Miss Edith Winnette'**

Pod Parent: *Brugmansia* 'El Dorado'

Pollen Parent: *Brugmansia* 'Archangel'

Hybridizer: Dan Carter

Seedling Parent: Dan Carter (USA)

Flower Form: single

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: large, waxy, strong pink/coral flowers all along the branches; robust plant; no pest or virus problems; named for the hybridiser's mother.

***Brugmansia* 'Mon Amour Joli'**

Pod Parent: *Brugmansia* 'Triplette'

Pollen Parent: *Brugmansia* 'DS Mandarine'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: pink

Flower Position: pendant

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: strong pink double flowers.

***Brugmansia* 'Peppermint Patty'**

Pod Parent: *Brugmansia* 'Karoline'

Pollen Parent: *Brugmansia* 'Ludger's Summer Dream'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Brent Fellmy (USA)

Flower Form: single

Flower Color: apricot/melon/peach

Flower Position: nodding

Flower Shape: trumpet

Foliage: Solid

Species/Breeding History Set: Cubensis

Comment: strong grower; saw-toothed leaves; bicolored large flowers last 4 to 5 days; medium sweet scent.

***Brugmansia* 'Pinky Burr'**

Pod Parent: *Brugmansia* 'Angels Sunrose'

Pollen Parent: *Brugmansia* 'Tabby'

Hybridizer: Mike Pettit

Seedling Parent: Mike Pettit (UK)

Flower Form: double or more

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: medium size blooms with the odd single; not an overpowering baby powder perfume; bush like growth with smallish leaves; shows good pest resistance.

***Brugmansia* 'Revorange'**

Pod Parent: *Brugmansia* 'Tip Top'

Pollen Parent: *Brugmansia* 'Chabalou'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: orange

Flower Position: nodding

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: profuse bright orange funnel-shaped flowers

***Brugmansia* 'Rosyonne'**

Pod Parent: *Brugmansia* 'Le Premier'

Pollen Parent: *Brugmansia* 'Super Pink'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: very dark pink

Flower Position: nodding

Flower Shape: intermediate trumpet/funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: Rich deep pink, wide-skirted flowers.

***Brugmansia* 'Shangrala'**

Pod Parent: *Brugmansia* 'Angels Flight'

Pollen Parent: *B.* 'Angels Endless Summer'

Hybridizer: Edna Murphree

Seedling Parent: Brent Fellmy (USA)

Flower Form: double or more

Flower Color: apricot/melon/peach

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: tall-grower; puts out a generous amount of buds; flower starts out white/cream then turns a wonderful pink with a wide mouth.

Brugmansia* 'Signora Tonitto'*Pod Parent:** *Brugmansia* 'Clementine'**Pollen Parent:** unknown**Hybridizer:** Wayne Carter**Seedling Parent:** Wayne Carter (Australia)**Flower Form:** double or more**Flower Color:** orange**Flower Position:** nodding**Flower Shape:** intermediate trumpet/funnel**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comments:** compact, to 2 m, easily trained as standard; leaves mid-green, pest and disease resistant; flowers slightly smaller than 'Clementine' but triple, show no deformity; scent slightly citrus throughout the day intensifying morning and early evening.***Brugmansia* 'Sweet Ebunny'****Pod Parent:** *B.* 'New Orleans Lady'**Pollen Parent:** *Brugmansia* 'Margaret'**Hybridizer:** Gill Peters**Seedling Parent:** Gill Peters (UK)**Flower Form:** double or more**Flower Color:** pink**Flower Position:** nodding**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** petite, compact bloom with strong baby powder scent; strong growing plant with high pest resistance.***Brugmansia* 'Tabbie's Friend'****Pod Parent:** *Brugmansia* 'Tabby'**Pollen Parent:** *Brugmansia* 'Bergprinzessin'**Hybridizer:** Mike Pettit**Seedling Parent:** Mike Pettit (UK)**Flower Form:** double or more**Flower Color:** white/cream**Flower Position:** pendant**Flower Shape:** trumpet**Foliage:** solid**Species/Breeding History Set:** Cubensis**Comment:** fast grower; good shaped foliage; pest resistant; large bloom with a medium strength perfume.

***Brugmansia* 'Tijericho'**

Pod Parent: *Brugmansia* 'Tip Top'

Pollen Parent: *Brugmansia* 'Chabalou'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: orange

Flower Position: nodding

Flower Shape: funnel

Foliage: solid

Comment: Large nodding orange funnel-shaped flowers.

***Brugmansia* 'Totem'**

Pod Parent: *Brugmansia* 'Profusion'

Pollen Parent: *Brugmansia* 'Super Spot'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: single

Flower Color: pink

Flower Position: pendant

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: Almost pendent funnel-shaped flowers of a strong pink.

***Brugmansia* 'Triple A'**

Pod Parent: *Brugmansia* 'Angels Goldface'

Pollen Parent: *Brugmansia* 'Triplette'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: yellow

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: Double yellow flowers with fairly short petal tips.

***Brugmansia* 'Triplette'**

Pod Parent: *Brugmansia* 'Tijericho'

Pollen Parent: *Brugmansia* 'Cruzito'

Hybridizer: Didier Sevestre

Seedling Parent: Didier Sevestre (France)

Flower Form: double or more

Flower Color: pink

Flower Position: nodding

Flower Shape: trumpet

Foliage: solid

Species/Breeding History Set: Cubensis

Comment: rich pink double flowers.

***Brugmansia* 'Long Tall Sally'**

Pod Parent: *Brugmansia* 'Pirouette'

Pollen Parent: *Brugmansia* 'Angels Honeymoon'

Hybridizer: Elizabeth Fichtl

Seedling Parent: Sissi Wedgwood (USA)

Flower Form: double or more

Flower Color: pink

Flower Position: pendant

Flower Shape: funnel

Foliage: solid

Species/Breeding History Set: Cubensis

Comments: extremely long flower tube remains narrow until the bottom of the bloom then flares dramatically into wide skirts.

***Datura* 'Wondrous Bella'**

Pod Parent: *D. metel* [triple yellow]

Pollen Parent: *D. metel* [double purple]'

Hybridizer: Jeff Horder

Seedling Parent: Jeff Horder (Australia)

Flower Color: Mixed cream/gold and purple

Color Pattern Description: Speckled stripes

Flower Opening: fully

Number of points per corolla: 5

Foliage: Solid

Fruit: pointing up, smooth, disintegrates irregularly.

Species: Metel

Type of cultivar: more or less annual, perpetuated by seed

Comment: high resilience to mites.

ICRA BUSINESS

A number of new *Brugmansia* cultivar names have been placed in the public domain on-line or in electronic publications which do not meet the conditions of publication set out in the 2009 ICNCP — specifically that they should appear in dated hard copy (Art. 25.1). Such names are open to establishment for other cultivars, and their cultivars are open to having other names established for them. Therefore, in the interests of nomenclatural stability, we establish them here. If it transpires that any of these have in fact already been established, then those names of course date from the earlier publication. It is to be understood that the epithets listed here are preceded by the name of the denomination class, *Brugmansia*.

Epithet	Colour	Petal Tips	Form	Pod Parent	Pollen Parent	BHS	Hybridizer	Seedling Parent	Origin	Year
‘Angels Show Time’	orange	long	double				Anne Kirchner-Abel		Germany	2015
